### **DETAILED ACTION**

In response to the communication filed on September 7, 2004, claims 1-14 are active in this application.

#### ***Oath/Declaration***

Oath/Declaration filed on December 29, 2003 has been considered.

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory S. Gewirtz on September 28, 2004.

The application has been amended as follows:

Cancel claims 10-14.

In the Abstract section, line 14, delete "Fig. 6".

#### ***Reasons For Allowance***

2. Claims 1-9 are allowable over the prior art of record.
3. The following is an examiner's statement of reasons for allowance: the prior art of record neither teach nor make obvious the claimed limitation of the instant application as a whole as

Art Unit: 2813

recited in claim 1. In particular, the prior art does not teach or suggest the particular subset of the process steps for forming a ferroelectric capacitor by etching the intermediate barrier layer using a second recipe resulting in the formation of a second fence clinging to and structurally supported by the first fence while at the same time etching away a substantial portion of the first fence to remove the structural support provided to the second fence so that the second fence is lifted-off from the sidewalls leaving the sidewalls substantially free of clinging fences.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hornik et al., U.S./6,746,877 B1 ; Zhuang et al., U.S./6,762,064 B1 ; Egger et al., U.S. Pub. No. 2004/0150923 A1 and Egger et al., U.S. Pub. No. 2004/0164050 A1 teach the similar processes for forming the device.
